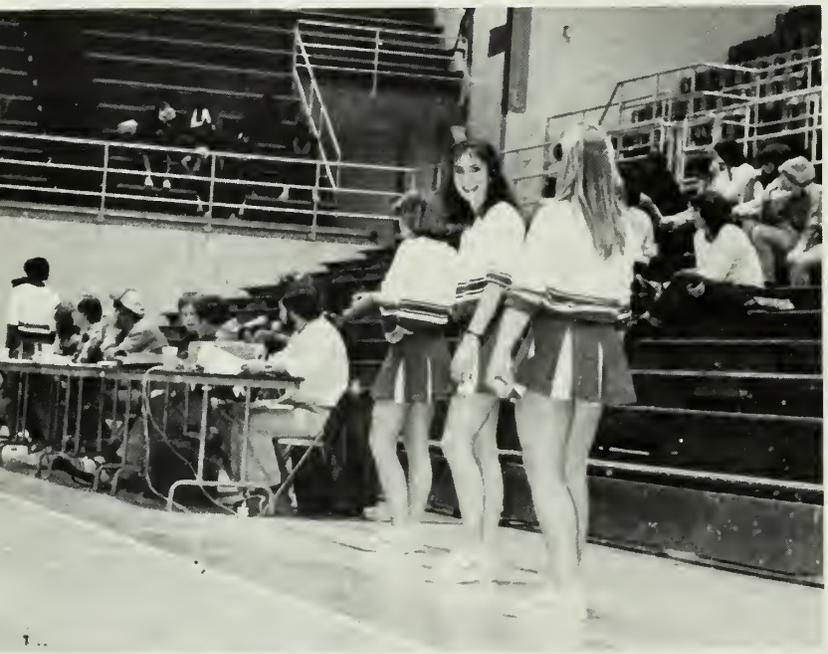
The future is lying ahead of us
But we can't really see

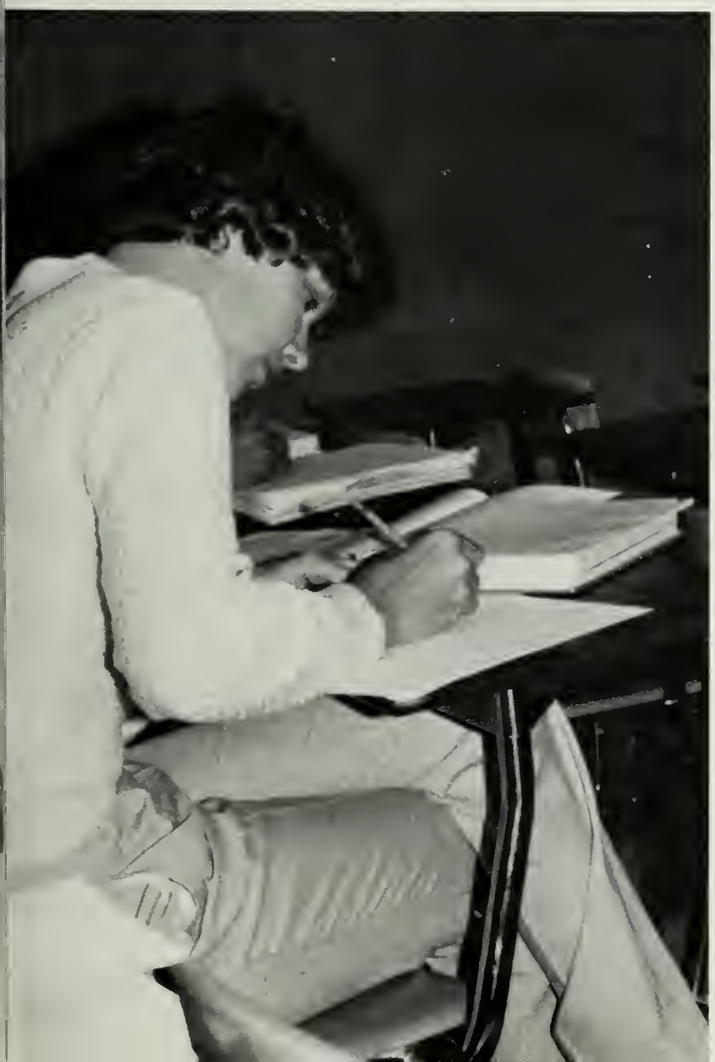


The path that is planned for us -
What is yet to be.

We are free to pick
and choose the path -
The way that we
must go.

We are free to find
the time and place
Where our dreams
may grow.

We are free to sit back
and relax,
Live our life
from day to day.
We are free to go to
parties and to socialize
And dream
our life away.



We are free to accomplish
Together or alone.
Accomplishments may be big
or small,
Yet ours to call our own.

Appreciate this freedom
And all that it can mean.

We're free to express,
to speak, to live,
A life along our dream.

It is all that remains after the years have passed and fond memories fade. The REFLECTOR brings into focus all of those memories. Under the leadership of Mike Ingram, the staff has composed this account with the help of hard-working staff members, cooperative teachers, and students, and, of course, our advisor, Dr. Keith Hickman.

The purpose of SME is to advance the scientific knowledge in tool and manufacturing engineering and to provide means and methods of applying such knowledge. To achieve this purpose, the society meets once a month with speakers participating from local and statewide manufacturing concerns.

The SME at GSC has approximately 40 student members with P. Douglas Fowler as faculty advisor. Since they had only one car pass everyone piled into one truck. They arrived at the Space Center about 2:00 am and slept on the ground until morning. Finally, at 6:50 am the shuttle was launched.

On May 22, 1981, a chapter of Sigma Pi Sigma, national physics honor society, was established on the GSC campus. Sigma Pi Sigma exists within the Society of Physics Students; however, in order to be a member of Sigma Pi Sigma, one must be in the upper one-third of his or her class and must have completed at least five courses which may be credited toward a physics major. STUDENT GOVERNMENT ASSOCIATION

GSC's Student Government Association, a tool for the use of the student body to make their desires known to the administration of our college; also an instrument by which students can have tremendous leadership opportunities. During the past 80-81 year, the Student Government was involved in an attempt to give students a greater voice in the Statesboro Community, by registering over 600 college students to vote. Your Student Government in conjunction with the Political Science Club, brought in speakers dealing with U. S. Nuclear Strategy. (arms) The Student Government also was used by the students to relay their opinions to the president on the initiation of football here at GSC. These are just a few of the events the SGA was involved in. Why don't you get involved?

WVGS

This has been a year of change for WVGS. Most of the change can be readily seen. They have a new 120 foot tower which doubled their broadcast area, a new frequency at 107.7, and the addition of more campus news plus the ABC entertainment news network.

WVGS has continued to meet the students needs by presenting programs on topics of student interest. In the next few years, WVGS has a goal of increasing the output power to better serve the students of GSC and the residents of Bulloch county. WVGS will continue to improve its operations with the help of the students and faculty of GSC.

Eagles Have Another Outstanding Year

Georgia Southern had another outstanding year in baseball, but stumbled in the TAAC Championships and lost their chance for a third straight bid to the NCAA Championships. After going unbeaton in regular season conference play, including winning four and tying one with Mercer, the Eagles lost twice to the Bears in the TAAC Championships in Abilene, TX. Derrell Baker received several individual honors after breaking the Eagles single season batting average record with a .462 mark. He was named to the TAAC All-Conference and All-Tournament teams; was TAAC player of the year; NCAA All-Altantic Region; Thirdbaseman and NCAA Second Team All-America. Young Eagles Played Consistently

A young Eagle squad played consistent, if not spectacular golf. Under the direction of interim coach George Cool, the Eagles had a string of top ten finishes. However, it was not quite enough to earn a tenth straight trip to the NCAA Championships. The Eagles placed second in the Trans America Athletic Conference Championships. Jodie Mudd won De TAAC title, to go along with championships at the Dixie Intercollegiate (Fall, 1980), Furman and Palmetto Championships (Spring, 1981). In the latter two' Mudd shot course and tournament records enroute to the titles. He became the first GSC golfer since 1963 to earn First Team All-America rating. He was also named to the TAAC All-Conference team and the TAAC Player of the Year in Golf. Tripp Kuhlke also earned All-Conference honors.

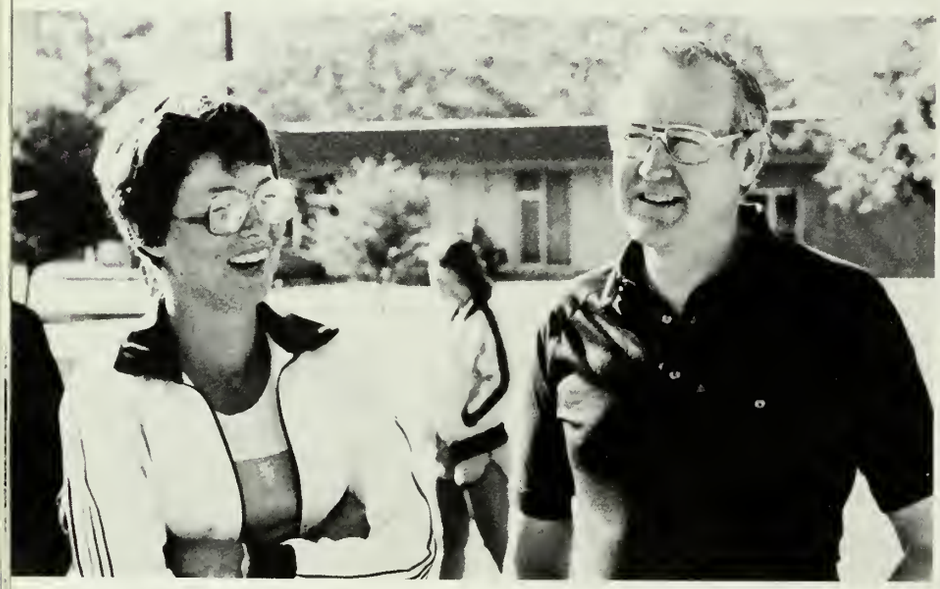
Lick Believes GSC Catalyst for Southeast

President Dale Lick says his responsibility is to analyze the needs of this part of the state and to bring these needs to the attention of the Board of Regents.

"Georgia Southern is to be a catalyst in helping what is happening to the southeast. There are five words to describe the flavor of the '80's: people, for reflecting their importance; service, created to serve; cooperation, there is a limited amount of dollars to be divided; and leadership, should be a leader in the community and state for development and services.



Austin Has Progressive Year

Dr. Charles Austin, vice-president of Academic Affairs, looks at the 1981 year as being hectic, progressive and filled with academic changes. He was very anxious about the construction of a consulting committee. This committee increases student and faculty participation in any decisions or changes to be made.

Austin has been very busy revising the standards of GSC. He believes that with a rise in admission standards, Georgia Southern will attract better students and in effect the school will be more successful. This year there has been an addition of two schools: the School of Technology and the School of Health, Physical Education, Recreation and Nursing. These two new schools have added five new departments to GSC.

Next year Austin is looking forward to having a Honors Program and more International studies. The future also holds plans for a docturnal program with the University of Georgia. Austin is busy trying to increase programs at GSC so that we will have something to interest of everyone.

Cook Is Looking To The Future

Funds are Mr. Bill Cook's, the vice-president for business and finance, main worry. Energy is a high cost but GSC has been a leader in energy conservation. Cook believes that this is due to Southern being the first school to install computerized energy management. The money saved on energy costs has helped the football program to get underway.

Cook would like to see more work done to the buildings on campus but, auxiliary work is only done with auxiliary funds. This fact has not hindered Cook. The completion of the Continuing Education building, GSC's official conference center, was a fine accomplishment. The Student Auxiliary area has also been expanded with the addition of The Deck Shoppe. Plans are also being made for work to be done on Oxford and Deal Halls.

Pre-registration and keeping a clean campus are other accomplishments Cook has been able to make this year. Progress is slow, but Cook is looking forward to future fundings that will allow for more expansion.

Thy soul was like a star and dwelt apart;

In cheerful godliness: and yet thy heart
The lowliest duties on herself did lay.

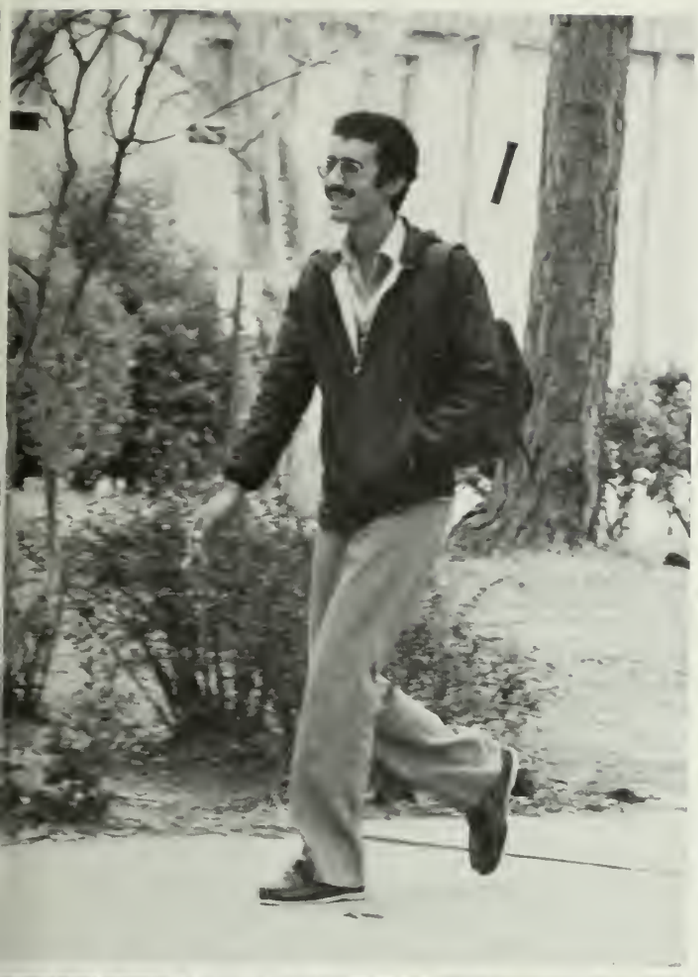
We are free
to be courageous.
We are free
to venture out.

We are free
to be right,
to make mistakes,
As we learn
what life is about.

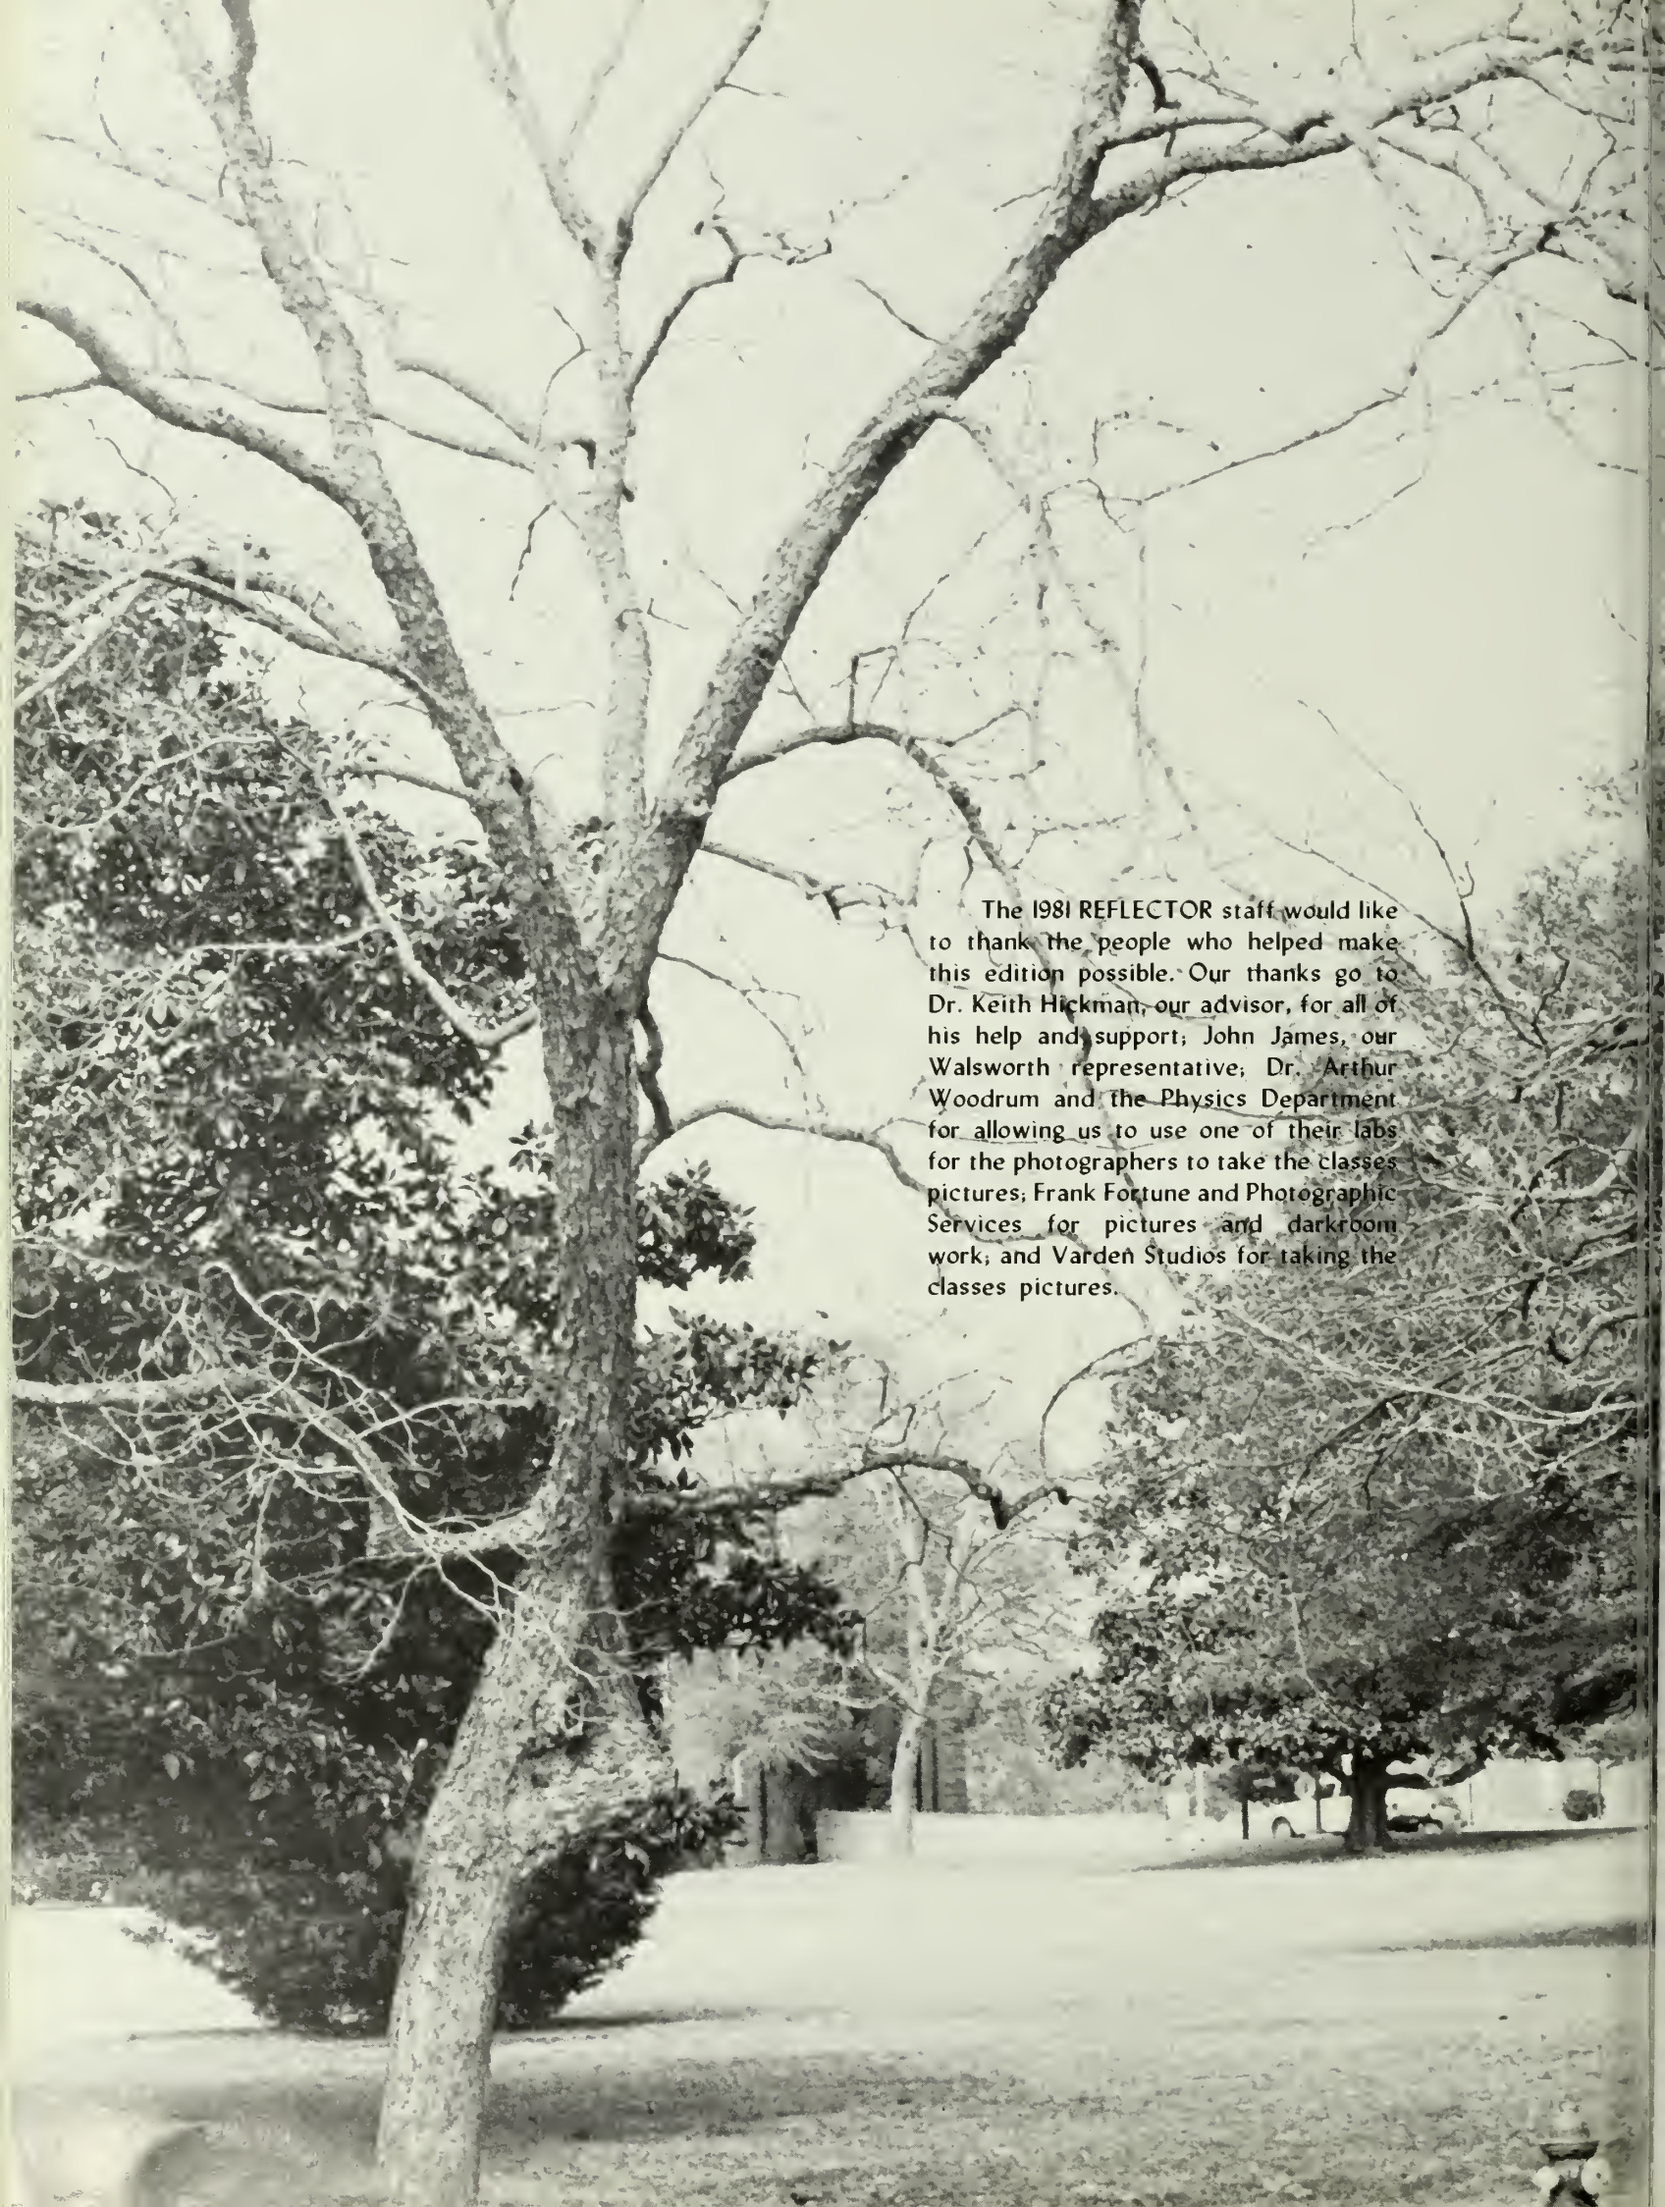
We are free to collect our memories
Before we go our separate ways -



When the time for hopes and dreams
Will become our yesterdays.

But they will gain
everlasting importance -
These good times
of the past -

Because there is no
going back
And only memories
last.



The 1981 REFLECTOR staff would like to thank the people who helped make this edition possible. Our thanks go to Dr. Keith Hickman, our advisor, for all of his help and support; John James, our Walsworth representative; Dr. Arthur Woodrum and the Physics Department for allowing us to use one of their labs for the photographers to take the classes pictures; Frank Fortune and Photographic Services for pictures and darkroom work; and Varden Studios for taking the classes pictures.
